📢 An	nouncements	Dear Incoming Student.					
😧 He	elp	The Mathematics Department welcomes you to Providence College. Whatever your academic interests are, we are committed to giving you the					
		best possible advice regarding mathematics courses. For this reason we have developed a Mathematics Test and Survey. Several majors (Biology, Chemistry, Economics, Marketing and many others) require at least one mathematics course. But even if you are not planning on a major with a mathematics requirement, you will want to take the Mathematics Placement Test and Survey. One of the requirements for graduation from Providence College is a course in "quantitative reasoning." Although such a course can be found in some of the social science departments, most students satisfy this quantitative reasoning requirement by taking a course in the mathematics department. Taking the Mathematics Placement Test and Survey will help us best advise you on what mathematics course you should take.					

You should try to complete each subject in one sitting. If you get interrupted, you can pick up where you left off as long as it's within a day of your starting the test.

If you need to retake a test, you can – but the tests are intended to be an accurate reflection of your skills. You do not need to get the highest score possible.

If you need assistance with	Contact
